

THE LATEST IN BOTTLE-LESS TECHNOLOGY

A Fresh Approach and New Look

The innowave Chiller 3™ Counter-Top brings a unique, fresh approach, and a new look, to point-of-use systems in the marketplace. Unlike a bottled water cooler, incoming tap water is treated as it's needed, so the water is always fresh and great tasting. The innowave Chiller 3™ Counter-Top has a cooling capacity that surpasses that of the ordinary bottled water cooler, so you are sure to get a cold, refreshing serving of drinking water every time.

Water - Drink 8 a Day

Health care professionals recommend that the average person drink at least 8 - eight ounce servings of water every day. Unfortunately, over 2,100 contaminants have been identified as potential threats to the drinking water supply. They fall into four groups: Organic, Inorganic, Biological and Radioactive. A point-of-use water treatment system is ideal for consumers concerned about their local water quality, or who are simply looking to have better tasting water.

Modular Treatment Package

Knowing that water conditions vary between locations, innowave developed this system so it can be tailored to suit a variety of water conditions and meet customers' needs. Trained innowave® Dealers are customer-focused and will discuss the treatment technology available to combat local water conditions. In addition to a customized treatment package, this system is equipped with leak detection for added peace of mind. Once the system is installed, an innowave® Dealer provides periodic maintenance to ensure the system performs as intended.

innowave Chiller3™ Counter-Top Specifications

Width: 13.5 in. (34 cm)
Depth: 14.5 in. (37 cm)
Height: 17.75 in. (45 cm)
Water Connection: 1/4" tubing

Weight: 42 lbs. (dry)
Power Supply: 120V/60Hz
Amps: 7.6 Amps (Hot/Cold)
All figures are approximate and subject to change

The innowave Chiller 3™ Counter-Top has been tested and complies with UL Standard 399

ITS™ Controls Bacteria

The innowave Chiller 3™ Counter-Top is also equipped with ITS™ (In-Tank Sanitization). This feature utilizes ultraviolet light as an effective method to prevent the potential for biofilm (slime) buildup in the storage tank after chlorine has been reduced through carbon filtration. Ultraviolet technology also helps reduce any heterotrophic bacteria that may occur in drinking water. This reduces the need for preventative maintenance and improves drinking water quality.

Tested and Certified Treatment Technology

The innowave Chiller 3™ Counter-Top has been tested and certified by WQA according to NSF/ANSI Standard 61: Drinking Water System Components - Health Effects.

THE LATEST IN BOTTLE-LESS TECHNOLOGY

No More Bottles

Bottle-less drinking water technology means no more deliveries of bottles, and no more lifting and storing of heavy 5-gallon bottles. innowave[®] systems are designed to plumb into existing water lines and use modern technology to treat water, on site, at the point-of-use.

Minimal Manpower

With innowave[®] systems, there are never any bottles to lift, store or replace. This reduces the risk of lifting injuries and workers' compensation claims associated with heavy bottles. To save you time and money, periodic preventative maintenance is performed according to innowave's strict protocols, by a qualified service technician.

Increase Security by Reducing Deliveries

Many companies today are focusing on building security. By decreasing the number of unauthorized personnel on your premises, you are contributing to the safety and well-being of all associates. Additionally, you're not blocking entries with delivery trucks, nor using up valuable space by storing water bottles!

Decrease Bacteria

Bottled water coolers have exposed reservoirs that can become contaminated if not sanitized on a routine basis. Someone's hands may be dirty when they are handling and changing bottles. Offer your employees better protection from bacteria with a self-contained, point-of-use system.

Support a Better Environment by Reducing Waste

Bottle-less technology is environmentally friendly. According to the World Wildlife Federation, the conservation organization, bottled water puts 1.5 million tons of plastic into the environment, worldwide, each year. By changing to a point-of-use system, your company is doing something better for the environment by reducing waste.

Less Paperwork and Hassles

An economical innowave[®] system can save money and reduce billing-related hassles. With an innowave[®] system, there's a level payment plan every month, regardless of usage. If you're charged with managing budgets while being accountable for quality, innowave[®] water systems are right for you.

The Highest Standards

innowave's goal is to provide water treatment systems that meet the highest standards and provide the safest drinking water. By utilizing a combination of modern water treatment technologies, innowave[®] water treatment systems consistently provide high quality drinking water.
